| Affects version: | | | |
| Description | | | |
| Hello | | | |
| After extensively testing the adplug plugin for audacious, I found there are certain files that should be played correctly by adplug (it are supported audio formats) don't play at all in audacious. I receive an error: can't read metadata of the files. Other players that use adplug (windows/android) can play the files without any problem. | | | |
| Here are the files: | | | |
| http://www.mediafire.com/file/m0yx2lac7sim685/metadata.zip/file | | | |
| Can this bug be fixed? | | | |
| thx | | | |

Hi

I found the same problem occurs in foobar2000 player which uses AdPlug too.
So it's a problem in AdPlug, not in Audacious.
The bug report can be removed!
