Description			
<p>You've made a nice clean responsive player, that is very sturdy... I thank you for all your dedication.</p> <p>I am wondering if you would consider implementing an option (in settings) to increase the font size in the playlist (of the GTK interface) ... Most shortsighted need a font of at least 18 to 26.</p> <p>More importantly, the player controls also need an enlargement of 100 percent (that means the option to make them double the current size).</p> <p>Thank you for reading.</p>			

History

#1 - October 08, 2020 13:25 - John Lindgren

- Tracker changed from Bug to Support

Font size and toolbar icon size are settings typically controlled by the desktop environment.
