Target version:																									
Affects version:	4.0.4																								
Description																									
Radio freezes after network shutdown or suspend mode																									
audacious qt v4.0.5																									
sequencing:																									
1. play radio station, eg https://lk.castnow.ru:8100/edm-320.mp3																									
2. sudo ip link set dev enp2s0 down or systemctl suspend																									
3. wait 7+ minutes																									
4. sudo ip link set dev enp2s0 up or power up																									
After that, the music does not play, even if you select another.																									
If you close the player, then the process still remains:
