

Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #1042

[32bit] Qt status icon menu has several problems

December 24, 2020 15:27 - Anonymous

|---|--------------------|------------------------|-------------------|
| Status: | Closed | Start date: | December 24, 2020 |
| Priority: | Minor | Due date: | |
| Assignee: | | % Done: | 0% |
| Category: | plugins/statusicon | Estimated time: | 0.00 hour |
| Target version: | | | |
| Affects version: | 4.0.4 | | |
| Description | | | |
| it's possible, that this is 32bit specific. | | | |
| with close to system tray enabled, closing works fine, but then, there's no GUI way to get it back. You should probably copy the way VLC is doing it, with a hide/unhide menu entry at the top. | | | |
| disabling the popup menu doesn't work. | | | |
| when started as headless. If you press on "open files" or "settings" the whole program crashes with a Qt error. I think, these entries should be grayed out when headless. | | | |
| I didn't tested scrolling. It seams there's a contradiction between scrolling for volume, and scrolling up to advance in the playlist. | | | |
| Audacious 4.0.5 (Ubuntu package) (version, not in the list) from the provided ppa, 32bit ubuntu 18.04, on a very old laptop. | | | |

You can left-click on the status icon to show the UI again.

Please see if these fixes resolve the crash in headless mode for you:

I'm supposed to compile it?

Hi! Welcome, you've found the website of the upstream Audacious project. We provide and distribute the source code. Other projects/individuals build binary packages from the source code we provide.

- Status changed from New to Closed

Oops, I fat-fingered and edited your comment, sorry. Anyway, the bug is fixed, closing.

File a bug against MATE for breaking left-click on the status icon. It sounds like that affects other applications as well.
