Affects version:			
Description			
Bonjour / hi everyone,			
-- English version bellow --			
J'ai installé la version la version 4.0.5 sur Windows 10.			
Mon problème : mes raccourcis sur mon clavier (Corsair K63) pause et suivant ne marchent pas.			
Auriez vous une solution ?			
Merci à vous			
Ive downloaded the 4.0.5 version (the stable one) on Windows 10.			
My issue : my shortcuts (play, next) don't work (on a K63 Corsair Keyboard)			
Do you have a solution to fix it ?			
Thanks a lot			
Hugo

Media key support isn't implemented on Windows yet. There's a pull request open for this feature on GitHub, but it needs work still.

OK find!

Do i have to close the topic then ?

Thank you for your quick answer!

I'll close the support ticket. You might be interested in watching feature request [#786](#).

An interim solution is to use a standalone hotkey tool such as AutoHotkey. I'll give an example on [#786](#).
