Target version:				
Affects version:	4.1			

Description

Audacious seems not to be able to save tags for/in Ogg/Opus files:

$ file Invisible.webm.opus.ogg
Invisible.ogg: Ogg data, Opus audio

Also for some reasons it uses the ffmpeg input plugin for playing such files. I've thought that Audacious supports Opus files natively.

History

#1 - April 06, 2021 09:06 - Artem S. Tashkinov

A dupe of [#865](#).

#2 - April 08, 2021 02:49 - John Lindgren

- Status changed from New to Rejected

- Tracker changed from Bug to Feature

Also duplicate of [#834](#).
