Target version:			
Affects version:	4.1		
Description			
Spectrum analyser not working. When activated puts a strip 12mm in height x width of the monitor, behind the Linux UI, outside the main window, at the bottom of the screen, with text saying "Spectrum Analyser" in left hand bottom corner. Best visual I have ever seen (3D waterfall), on previous version. Could watch it for hours Linux Mint 20.1 with Qt5
