Target version:				
Affects version:	4.1			

Description

Am trying to do an initial install of Audacious 4.1 but received this error when running configure: "error: no acceptable C compiler found in $PATH". System type is x86_64, Linux distribution is Ubuntu 20.04.2, Gnome version 3.36.8, windowing system X11. Config log and locale results are attached. Any help would be appreciated :-)

I'd recommend that you install Audacious using your system's package manager rather than from source.
