Suppressing errors in the status bar (Qt)

August 06, 2021 19:15 - Arek Kentski

Status:	Closed	Start date:	August 06, 2021
Priority:	Minor	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Affects version:	4.1		
Description			
Is it possible to hide bug reports displayed in the status bar when using the Qt interface? They show up every time songs in Opus format are playing (<nil> Invalid return value 0 for stream protocol).			

History

You can hide the status bar (View -> Show Status Bar). There's currently no other way to hide the warnings.

The hope in displaying the warnings is that someone would investigate them further and help to work towards a solution. In this case, does ffmpeg print similar messages when playing the same file? If so, it would be great if you could open a support ticket with the FFmpeg project.

#2 - December 25, 2021 10:43 - Arek Kentski

As a workaround, I'm using the GTK mode.

ffmpeg does not print similar messages.
