Target version:				
Affects version:	4.1			

Description

When one uses the open file dialogue, or the open directory dialogue, the dialogue window reverts to a default size every time it is opened. This is frustrating if one prefers a larger window.

Please save the dimensions of these dialogue windows and use the saved dimensions the next time the window is opened.

This could also be a solution for https://redmine.audacious-media-player.org/issues/1093
