<b>Affects version:</b>	4.1		
<b>Description</b>			
I would like to start Audacious automatically with my desktop session. So I added an .desktop entry inside my .config/autostart/ folder.			
The problem is on each start-up Audacious reports an error message saying "No JACK output ports were found. Please check settings." So I have to close the error pop-up and hit play. That starts the playback just one second after the error message.

I am not using PipeWire at this point so I am unable to provide any suggestions, sorry.

Closing.

#### #3 - October 01, 2022 08:55 - Alex .

I get the same error message for other applications e.g. Hydrogen Drum Machine as well, makes it a bug on Pipewire side, not on the applications.
