Target version:				
Affects version:	4.1			

Description

Hi,

Using Ctrl+J (jump to...) is a good tool to find and add tracks to queue. But tracks can be selected and added to the queue only **one after one**.

It would be easier to select multiples tracks and add them to the queue in one click.

History

#1 - March 16, 2022 23:03 - Heitor Rojas

Sorry this is on audacious-gtk3 (aur archlinux).

#2 - March 17, 2022 12:43 - John Lindgren

- Status changed from New to Closed

GTK3 is not supported. Closing.

#3 - July 10, 2022 00:58 - John Lindgren

- Status changed from Closed to Rejected
