

Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #1210

Asian characters show as question marks

April 11, 2023 20:46 - Manuel Griebmayr

<b>Status:</b>	Rejected	<b>Start date:</b>	April 11, 2023
<b>Priority:</b>	Minor	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Affects version:</b>	4.3		
<b>Description</b>			
The characters in the image attached probably show south korean characters. Interestingly they show correct in the playlist but not in the main window. Take for example this string "01 0000 0000 0 0 00" and name a music file with it and then play it with audacious.			

History

#1 - April 11, 2023 22:37 - John Lindgren

- Status changed from New to Rejected

WinAmp skins contain a small embedded font which does not include any Asian characters. This is a historical limitation. You have the option to disable the use of the embedded bitmap font if you want proper Unicode support.

#2 - April 12, 2023 20:49 - Thomas Lange

Audacious Settings -> Tab Appearance -> Section Fonts -> Use bitmap fonts (supports ASCII only)

This is the setting which John meant to disable.
