Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #125

Opening the preferences window causes a short sound delay

June 11, 2012 14:57 - Thomas Lange

Status:	Closed		**Start date:**	June 11, 2012
Priority:	Trivial		**Due date:**	
Assignee:			**% Done:**	100%
Category:	core		**Estimated time:**	0.00 hour
Target version:	3.3			
Affects version:	3.3			

Description

If you open the preferences window, there is a short delay in playback.
This is only occurring with 3.3.

audacious -V prints:
effect.c:68 [effect_start]: Starting effects.

Is the delay caused by the effects?

History

#1 - June 12, 2012 01:04 - John Lindgren

- % Done changed from 0 to 100

Not exactly. What was happening is this: the dropdown menu for the output bit depth was (wrongly) emitting a "changed" signal when it was created. Until recently, the signal was ignored, but now it resets the output plugin so that the new setting takes effect immediately. That reset caused the delay you heard.
