

Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #177

Song images for streams

September 22, 2012 14:51 - Marius Konitzer

Status:	Closed	Start date:	September 22, 2012
Priority:	Minor	Due date:	
Assignee:		% Done:	100%
Category:	core	Estimated time:	0.00 hour
Target version:	3.4		
Affects version:	3.3		

Description

I am the developer of [Audacious-DVB](#), an Audacious plugin that plays audio streams from a DVB adapter.

Since version 3.2 Audacious prevents plugins using non-'file://' URLs (e.g. Audacious-DVB uses 'dvb://') from providing their own song images (see `art_item_new` in `src/audacious/art.c`).

This is kind of a regression, because it was possible for non-'(http|https|mms)://' URLs before (see `audgui_pixbuf_for_entry` in `src/libaudgui/util.c`).

The change was introduced by commit `commit:57faea2041987fd2e1c46753414c649bc8b0cb42`.

Is there any way to restore the old functionality, i.e. let the respective plugin decide whether to provide a song image or not?

History

#1 - September 23, 2012 18:15 - John Lindgren

- Status changed from New to Closed
- Target version set to 3.4
- % Done changed from 0 to 100
- Affects version deleted (3.2, 3.2.1, 3.2.2, 3.2.3, 3.3-alpha1, 3.2.4, 3.3-beta1, 3.3-beta2, 3.4, 3.3.1, 3.3.2)

You're probably right that blacklisting anything but `file://` is too drastic. I've removed the check in the 3.4.x branch:
