Target version:			
Affects version:	3.3.4		
Description <p>Please add smart crossfade options for crossfade plugin. What i'm talking about is fade-in/fade-out start at certain level of loudness. As example i can give you screenshot from Sqrsoft Advanced Crossfading plugin 62656924_707a524d4d.jpg</p> <p>Time option is to set what percentage of fade-in/out buffer to actually fade in/out.</p> <p>Level option is to set lowest fade in/out point.</p> <p>Curve option is to set how fade in/out fades.</p> <p>dB Level option is to set at what dB level to start fade out of current track and start next track.</p> <p>Buffer lengths: max is maximum length of fade in/out buffer in ms; min is minimum length of fade in/out buffer in ms.</p> <p>Another option to set min length of track (in seconds) that will be faded in/out. This is for short tracks that doesn't need to be faded in/out.</p> <p>Hope you understand what i'm saying.</p> <p>Thanks.</p>			

History

#1 - March 11, 2013 09:19 - Artem S. Tashkinov

It's probably a dupe of bug 13.

#2 - April 11, 2013 03:26 - John Lindgren

- Status changed from New to Rejected

I'm happy to look at patches implementing these features. Closing until then.
