| Category: | plugins/alsa | Estimated time: | 0.00 hour |
| Target version: | | | |
| Affects version: | 3.3.4 | | |
| Description | | | |
| I'm tried to listen to internet radio with Audacious, but this unfortunately doesn't work for me. | | | |
| I get hangs/skips every few seconds and many messages like the following one on console: | | | |
| ALSA lib pcm.c:7832:(snd_pcm_recover) underrun occurred | | | |
| I'm currently playing the same pls playlist file with mplayer where it works fine without skipping/hanging sound. | | | |

- Status changed from New to Rejected

This is no bug, just a buffer underrun.

- Try:
1. Increasing the buffer size (File -> Preferences -> Audio -> Output Settings -> Buffer Size).
 2. Pausing the stream for a few seconds and then resuming it.
