Affects version:			
Description I have compiled the latest tarball audacious-3.4-beta2.tar.bz2 and plugins. Only a white sheet with folded corners is displayed instead of the audacious icon Did I miss a compiler option so the proper icon cna be displayed?

For no apparent reason, the icon is now displayed in the systray.
For all intent and purposes I'd like to mark this as [SOLVED]
...but I don't know how

- Status changed from New to Closed

This was probably caused by an outdated icon cache and installing/updating some other application (which updated the cache) fixed this.
