Description

I'm still seeing bug #155: some .minipsfs fail to play, looking for a .psflib directory one level up. Others seem to work fine. I've attached a directory where some work and many don't.

(The bug reporter wouldn't let me upload a 15 MB .tgz, so run "cat minipsfsaa minipsfsab minipsfsac > minipsfs.tar.gz" to recreate the archive.)

I'll look into it, but in future please upload large files to a third-party hosting site (there are a number of free ones) and give us a link instead of splitting the file.

Ah, apologies--will do.
