<b>Target version:</b>			
<b>Affects version:</b>	3.1.2		

**Description**

i built and installed the audacious 3.1.2 & its plugins from source; but whereas audacious 2.4.4 packaged in debian linux works fine with streaming acc & mp3, 3.1.2 built from source gives this error when a .m3u file is loaded:

No decoder found for [http://glb-stream14.streamserver.ch/1/rsj/aacp\\_64](http://glb-stream14.streamserver.ch/1/rsj/aacp_64)  
and  
No decoder found for [http://glb-stream12.streamserver.ch/2/rsj/mp3\\_128](http://glb-stream12.streamserver.ch/2/rsj/mp3_128)

it plays mp3 files ok, so that decoder does appear to work; i have not tried an .aac file.

worse yet, if i open the .m3u file in aud 2.4.4 and start it playing, then shutdown 2.4.4 and bring up 3.1.2, the "no decoder" message does not come up, the current stream track title is displayed in the playlist, aud says "buffering" and hangs while consuming CPU cycles, and can only be killed with 'kill -9 <pid>'

i will upload the .m3u file(s) i used. aud 3.1.2 and plugins configured and built with no errors.

History

#1 - January 05, 2012 18:53 - Steven Wright

N.B. this is issue is on debian linux; audacious 3.1.2 (+ plugins) worked correctly in FreeBSD using the same .m3u files.

#2 - January 05, 2012 20:04 - John Lindgren

- Status changed from New to Rejected

"No decoder found" isn't a bug. It means you didn't install the necessary decoders.
