Target version:			
Affects version:			

Description

Currently the .desktop file has to be translated manually.
It would be nice if it is generated automatically with the translations from a .po file.
All required changes are explained in the tutorial.

Our Makefiles aren't generated by automake. You'll have to figure out what commands automake is actually using to translate the file so that we can integrate those commands into our build system.

- Status changed from New to Closed

Meanwhile Transifex supports .desktop files.
I have uploaded a new resource there.

https://www.transifex.com/projects/p/audacious/resource/audaciousdesktop/

Marking as "Closed".
