<b>Target version:</b>			
<b>Affects version:</b>			
<b>Description</b>			
This is the only thing that is very necessary, because when I listen to music (although I think that not only I), frequently switch between playlists, you can make it an option, even for her and have to redo the style?

- Status changed from New to Rejected

The layout of the Winamp interface is restricted by the fixed format of Winamp skins. Use the GTK+ interface; features like this are why we created it in the first place.
