Custom rewinding step

February 06, 2014 13:11 - Maksim Kozlov

Status:	Closed	Start date:	February 06, 2014
Priority:	Minor	Due date:	
Assignee:		% Done:	100%
Category:	plugins/gtkui	Estimated time:	0.00 hour
Target version:	3.5		
Affects version:			
Description			
It would be useful if user had a possibility to set its own step size of rewinding. Now it is hardcoded in the skins and = 5000 ms.			

History

#1 - February 08, 2014 22:17 - Maksim Kozlov

- File 0001-gtkui-Add-a-custom-rewinding-forwarding-step.patch added

I prepared a small patch which adds this option to the gtkui plugin. This option allows to set forward/rewind step size from 100 to 10000 ms (with 100ms inc/dec).

Patch was created on the master branch (fa4e6321cd0a4ef1944e97975d578820b6b6d527)

#2 - February 09, 2014 04:44 - John Lindgren

Thanks for the patch. It looks pretty good, but I would rather not hard-code the slider increment to 100 ms. It should not be difficult to make it the same as the keyboard step size.

#3 - February 09, 2014 16:02 - Maksim Kozlov

Here is a second version of the patch. I made the slider increments changeable in compliance with the rewind step size (if I understood correctly the "keyboard step size").

#4 - February 09, 2014 16:09 - Maksim Kozlov

- File v2-0001-gtkui-Add-a-custom-rewinding-forwarding-step.patch added

Oops.. patch got lost in previous comment.

#5 - February 26, 2014 03:14 - John Lindgren

- Category set to *plugins/gtkui*
- Status changed from *New* to *Closed*
- Target version set to *3.5*
- % Done changed from *0* to *100*

Looks great, thanks!
