Description			
<p>Hello,</p> <p>as mentioned in the other issue #414, i just had a look at Audacious 3.4.1 inside a daily build of Ubuntu GNOME 14.04.</p> <p>I noticed the following:</p> <p>On Ubuntu GNOME 14.04, using the default GTK+ theme "Adwaita", Audacious is using a lot less icons than Audacious in Win32.</p> <p>This looks way better IMHO.</p> <p>Audacious Win32 uses a lot more icons everywhere and looks much more crowded because of that.</p> <p>Now, which icons do i mean? Some examples:</p> <p>When you go to Audacious -> Menu bar -> Files, then there is a icon in front of each menu entry, like Open Files..., Open URL..., Add Files... and so on...</p> <p>In Ubuntu GNOME, those icons are not there, which looks much clearer IMHO.</p> <p>Another example:</p> <p>When you close a playlist tab in Audacious, a confirmation dialog comes up, asking if you really want to remove the playlist.</p> <p>Then there are two buttons ("Cancel"/"Remove" or "Yes"/"No", depending on Audacious version). In Ubuntu GNOME, it's just those buttons. But in Win32 the buttons have icons on them, which look kinda bad, IMHO.</p> <p>Or when you right click on a track inside a playlist, a menu comes up as well and the menu entries have icons in front of them in Win32. In Ubuntu GNOME they do not.</p> <p>I would prefer if the Win32 version would not have those icons, just like in Ubuntu GNOME. They make everything look crowded.</p> <p>So, could you please remove them?</p> <p>It would be much appreciated.</p> <p>I'm still not quite sure though if this is something that you, the Audacious developer(s) can do, or if it has something to do with the different GTK+ themes being used (Adwaita vs. Windows), which would mean i would have to ask the GTK+ / GNOME developers?</p> <p>Regards</p>			

History

- Status changed from New to Rejected

The number of icons displayed is controlled by a GTK+ setting. You can add the following lines to gtksettings.ini:

```
gtk-button-images = 0
```

```
gtk-menu-images = 0
```

Closing since this is already a setting that can be changed by the user.

#2 - March 08, 2014 22:34 - Q. P.

Hello,

okay, those two lines do exactly what I asked for.

Thx.

Regards
