

## Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Feature #428

### Lyrics plugin should lowercase all-capital artist names before calling LyricsWiki API

April 09, 2014 17:54 - Richard Harris

<b>Description</b>			
<p>When searching for songs via the LyricsWiki API, artist names are case-insensitive except when one or more of the words in the artist name are all-capitals. For example, these queries match the page 'Dir en Grey:Diabolos':</p> <p><a href="http://lyrics.wikia.com/api.php?action=lyrics&amp;artist=dir+en+grey&amp;song=diabolos&amp;fmt=xml">http://lyrics.wikia.com/api.php?action=lyrics&amp;artist=dir+en+grey&amp;song=diabolos&amp;fmt=xml</a> <a href="http://lyrics.wikia.com/api.php?action=lyrics&amp;artist=Dir+en+grey&amp;song=diabolos&amp;fmt=xml">http://lyrics.wikia.com/api.php?action=lyrics&amp;artist=Dir+en+grey&amp;song=diabolos&amp;fmt=xml</a> <a href="http://lyrics.wikia.com/api.php?action=lyrics&amp;artist=Dir+en+Grey&amp;song=diabolos&amp;fmt=xml">http://lyrics.wikia.com/api.php?action=lyrics&amp;artist=Dir+en+Grey&amp;song=diabolos&amp;fmt=xml</a></p> <p>But these fail to return a result:</p> <p><a href="http://lyrics.wikia.com/api.php?action=lyrics&amp;artist=Dir+en+GREY&amp;song=diabolos&amp;fmt=xml">http://lyrics.wikia.com/api.php?action=lyrics&amp;artist=Dir+en+GREY&amp;song=diabolos&amp;fmt=xml</a> <a href="http://lyrics.wikia.com/api.php?action=lyrics&amp;artist=DIR+EN+GREY&amp;song=diabolos&amp;fmt=xml">http://lyrics.wikia.com/api.php?action=lyrics&amp;artist=DIR+EN+GREY&amp;song=diabolos&amp;fmt=xml</a></p> <p>The simple fix is, upon failure, to re-attempt the query with a lower-cased artist, which should always work.</p> <p>Related to <a href="#">#268</a> as the retry mechanism is identical.</p> <p>A song such as DIR EN GREY - DIABOLOS will fail a lyrics lookup because of the way MediaWiki works - it is case-insensitive except for song titles in all capitals.</p>			

#### History

##### #1 - April 10, 2014 16:22 - John Lindgren

Why would an artist name ever be in all caps? In general, I'm against adding "on the fly" corrections for bad tags in Audacious. The tags should be corrected by a tag editor instead.

##### #2 - April 10, 2014 16:25 - Richard Harris

Why? Because that's how the artist chose to style the ID3 tags. I didn't post this for speculation, it actually affected me.

I don't think this is a correction of bad tags, more a workaround for limitations in the LyricsWiki API, which is supposed to be case-insensitive.

My response was not speculation either. I suggested a concrete solution of using a tag editor to fix the ID3 tags.

I don't think this is a correction of bad tags, more a workaround for limitations in the LyricsWiki API, which is supposed to be case-insensitive.

If this is a defect in the LyricsWiki API, then you should report it to the LyricsWiki team so they can implement a real fix, instead of asking for a workaround in Audacious.

**#4 - September 06, 2014 15:19 - Richard Harris**

Resolved at the LyricWiki side.

**#5 - September 21, 2014 06:26 - John Lindgren**

- *Status changed from New to Rejected*

All right, closing.
