Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #471

Dekstop Notification

October 22, 2014 18:12 - Audy Murphy

Status:	Rejected		**Start date:**	October 22, 2014
Priority:	Minor		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Affects version:	3.5.1			

Description

Every now and then I would have to click on something to cause the desktop notification to disappear.
By anything I mean, another window or the desktop or the panel even on the desktop notification itself.

The only way to restore normal behaviour has been to restart my laptop. A simple log out would not restore proper behaviour.
I have even tried to disable desktop notification and re-enabling it, to no avail.

I have finally discovered what causes this behaviour. Clicking on the network icon in the panel causes the desktop notification to stay up.

My Environment:
Audacious 3.5.1
Kernel 3.17.0-1
Manjaro KDE 4.14.1
Plasma nm 0.9.3.4-3

I'll gladly supply any additional information if requested.

Thanks.

Audacious doesn't know and doesn't care whether you click on the network icon in the panel. Furthermore Audacious does not control when the notification is hidden, it only provides a hint to the notification service. So this is not a bug in Audacious but rather in your notification service (presumably part of KDE).
