<b>Target version:</b>			
<b>Affects version:</b>	3.5		
<b>Description</b>			
Audacious 3.5 depends on a version of libguess that does not even exist yet.			

#### History

##### #1 - November 02, 2014 14:13 - John Lindgren

- Assignee set to Ariadne Conill

##### #2 - November 02, 2014 14:43 - Thomas Lange

Additionally the download links to older versions are dead.

```
wget http://distfiles.atheme.org/libguess-1.1.tar.gz
2014-11-02 14:42:26 ERROR 404: Not Found.
```

##### #3 - November 02, 2014 19:48 - John Lindgren

The Git repository for libguess is at <https://github.com/kaniini/libguess>, and libguess 1.2 has been tagged for a while now, but atheme.org never added a tarball for it. Possibly we should just create one and host it on audacious-media-player.org.

I am aware of where the Git repo is. Part of putting out releases is rolling a tarball for the release. This is where things have broken down. By the lack of the tarball a release does not exist to most open source projects.

- Status changed from New to Closed

Atheme.org was discontinued, you can find distfiles for libguess-1.2 at <http://rabbit.dereferenced.org/~nenolod/distfiles/>

Thanks for the reply. I wouldn't have even filed the bug report if I had come across a URL on what looks like the official web site pointing to there.

Then at least update the links at <http://atheme.org/projects/libguess.html>.  
How are package maintainers supposed to know this URL?
