

Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #523

FLAC plugin broken on Windows 8.1, FFMPEG plugin works

March 20, 2015 01:11 - Jonathan Lane

| Target version: | 3.6.2 | | |
| Affects version: | 3.6 | | |
| Description Playing back certain FLAC files on Windows 8.1 in Audacious 3.6 will immediately cause Audacious to crash and the application to close. Disabling the FLAC plugin and relying on the FFMPEG plugin to handle FLAC playback works. I suspect this is a bug in the upstream FLAC library, since Clementine 1.2.3 exhibits very similar behavior on Windows 8.1, and they determined it was a bug in dependency code. | | | |

History

Please attach an example file.

#2 - March 21, 2015 06:22 - Jonathan Lane

Each of the files I've experienced this problem with exceeds 5MB in size, so I can't attach them. Here is a link to one of the files:

<http://a.pomf.se/aikkfo.flac>

#3 - March 21, 2015 18:26 - John Lindgren

I can't reproduce the crash on Windows 7.

#4 - April 12, 2015 05:18 - John Lindgren

Can anyone else reproduce this? Preferably on a Windows 7 machine?

#5 - April 17, 2015 16:26 - Artem S. Tashkinov

John Lindgren wrote:

I can confirm that Audacious 3.6.1 is crashing on Windows 8.1 64 with the provided FLAC file but since the reporter says it's a problem with the upstream library this bug report is actually invalid.

In Windows 7 64 Audacious doesn't crash.

#6 - April 18, 2015 15:06 - John Lindgren

Is there an upstream fix yet? It would be nice to include a patch in the next Windows build if one is available.

#7 - April 20, 2015 13:51 - Artem S. Tashkinov

Here's the fix: <https://git.xiph.org/?p=flac.git;a=commitdiff;h=a84587061cab4d55fa2668ea431d3b61e711c8a3>

#8 - April 20, 2015 23:07 - John Lindgren

I'm skeptical. Has anyone confirmed (i.e. recompiled libflac and tested) that this really fixes the crash?

#9 - April 21, 2015 18:35 - Artem S. Tashkinov

I surely won't test it, 'cause I have exactly zero desire to install Windows 8.1 again, besides mingw which takes a lot of time to properly set up ;-)

The OP ought to test it, but so far it seems like he's lost interest to this bug report.

Yeah, me too.

#11 - April 22, 2015 07:39 - Jonathan Lane

Unfortunately I can't test this either, since my Windows 8.1 machine is a company laptop and I can't install a full MinGW toolchain to rebuild libflac.

- File flac.jpg added

!!

Audacious 3.6.1 crashes on windows 8.1 with flac files, any hint?

You may help by compiling libflac with the proposed patch. There's no need to post screenshots or any debugging information - the crash has been successfully reproduced.

#14 - May 28, 2015 18:05 - JM Phone Home

I apologize for posting the screenshot, I followed the link upper on this section, <https://git.xiph.org/?p=flac.git;a=commitdiff;h=a84587061cab4d55fa2668ea431d3b61e711c8a3> but I don't know how to compile on Windows, Would yo be so kind to redirect me to any link related where I can learn how to do it? Also installing 3.6.1 version under Ubuntu 15.04 with the last kernel I have problems like this:

ERROR plugin-init.cc:132 [start_single]: No output plugin found.
(Did you forget to install audacious-plugins?)

But the plug in is already installed from the same repository, Do I must report this on a different tag?

I will appreciate any help, thank you!

#15 - May 31, 2015 05:35 - John Lindgren

- Status changed from New to Closed
- Target version set to 3.6.2
- % Done changed from 0 to 100

The 3.6.2a build has libflac configured with --disable-sse. This fixes the crash for me on a Windows 10 preview build.

#16 - October 09, 2015 00:13 - Sergey Bromirskiy

I've tested 3.6.2a and 3.7beta1 versions on windows 8 and 8.1 and found similar problem with flac plugin. Adding flac files to play list very frequently causes Audacious crash. Disabling flac plugin lets add and playback flac files.
