<b>Description</b>			
<p>Hi! When i tried compiling Audacious in my system, i get this error:</p> <pre>/usr/lib64/gcc/x86_64-suse-linux/4.8/../../../../x86_64-suse-linux/bin/ld: cannot find -lQt5Widgets collect2: error: ld returned 1 exit status Failed to link libaudcore.so! ../buildsys.mk:231: attempt to perform a prescription for purpose «libaudcore.so» failed make[5]: *** [libaudcore.so] Error 1 ../buildsys.mk:116: attempt to perform a prescription for purpose «all» failed make[4]: *** [all] Error 2 ../buildsys.mk:123: attempt to perform a prescription for purpose «libaudcore» failed make[3]: *** [libaudcore] Error 2 ../buildsys.mk:116: attempt to perform a prescription for purpose «all» failed make[2]: *** [all] Error 2 buildsys.mk:123: attempt to perform a prescription for purpose «src» failed make[1]: *** [src] Error 2 buildsys.mk:116: attempt to perform a prescription for purpose «all» failed make: *** [all] Error 2</pre> <p>Without Qt5 audacious works well.</p>			

#### History

##### #1 - April 14, 2015 18:20 - Thomas Lange

Do you have installed "libQt5Widgets5"?

<https://software.opensuse.org/package/libQt5Widgets5>

##### #2 - April 14, 2015 18:36 - Vlad Hnatiuk

Of course libQt5Widgets5 & libQt5Widgets5-dev are installed.

Problem solved after updating Qt5.

But when I compiled audacious-plugins I get another error, which is described in this topic:

<http://redmine.audacious-media-player.org/boards/1/topics/1028> (last two replies).

- Status changed from New to Closed

Read what the error says and install FFmpeg.

Read what the error says and install FFmpeg

checking for FFMPEG... no

configure: error: FFmpeg is not installed or too old (required: libavcodec 53.40.0, libavformat 53.21.0, libavutil 51.27.0). Use --with-ffmpeg=none to disable the ffaudio plugin or --with-ffmpeg=libav to use libav instead.

ffmpeg 2.6.1 is installed. openSUSE 13.1 provides libavcodec55, libavformat55, and libavutil52; the latter version of each is newer than the stated requirements.

How can I get this to compile?

**#7 - April 15, 2015 12:49 - John Lindgren**

Difficult to say without being there firsthand. You should probably just install the version of Audacious that OpenSUSE provides.
