Affects version:	3.6.2			

Description

First at all, congratulations for a new Audacious 3.6. On the other hand, I want to report a simple issue. It seems that the command "Alt+F" that appears in the playlist to "Open Containing Folder" doesn't work. Perhaps it is related to the fact that, "Alt+F" opens the File menu option, so I wonder if a different keyboard shortcut would help.

In Windows, the option doesn't work regardless if you use the mouse or the shortcut. In Linux, it works with the mouse.

- Status changed from New to Closed

- Target version set to 3.7

- % Done changed from 0 to 100

This is a bug in GIO. It will be patched over in 3.7 (unfortunately the patches could not be submitted upstream since the code has been substantially rewritten).
