

Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #552

Settings for the status icon plugin won't display / minimize to tray not possible with KDE Plasma 5.3.1

June 09, 2015 22:18 - S P

Status:	Rejected	Start date:	June 09, 2015
Priority:	Minor	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Affects version:	3.6.2		

Description

The settings menu for the status-icon plugin does not pop up if its clicked in the menu. The status icon in the tray is present though and works properly. But audacious cannot be minimized to the tray.

When starting Audacious via the command line this message is spit out:

WARNING plugin-init.cc:147 [start_multi]: Status-Icon failed to start.

Version 3.6.2 running Kubuntu 15.04 with KDE Plasma 5.3.1

Are you using the Qt interface? The status icon only works with the GTK and Winamp interfaces.

Yes, the Qt interface. And the status icon works fine.

I think you may not be looking at the status icon but only at the Audacious icon in KDE's task switcher. Please attach a screenshot so we can try to clear up the confusion. The status icon will not load at all if you are using the Qt interface (it explicitly checks this on startup).

I have the autohide function on for the taskbar thats why. I thought the popup would be sufficient (belongs to the status icon as I understand it). Well, here is another with the taskbar shown.

The popup in your screenshot is part of KDE and communicates with Audacious through the MPRIS 2 interface. It has nothing to do with the status icon. This is what the status icon looks like (in XFCE, with the GTK2 interface):

status icon.png
