Description

I'm running audacious 3.7.1 in Windows 7 but I can't change the language interface although they exist in locale folder.
There is no way to do that in the options menu.
I've already try to fix that via environment variable, and nothing!
How can I change the language of audacious?

I'm not 100% sure of this, but I think Audacious will follow whatever language Windows is set to (see
http://windows.microsoft.com/en-us/windows-vista/change-the-display-language).
