Description

Hi,

is it possible to add a feature which brings the Audacious player to front when adding new files?

Right now, when adding new files the player window stays in the back/in the taskbar/in the tray.

Regards
Andreas

- Status changed from New to Rejected

The "-m" command line option does this already.

You might want to read "man audacious" and "man audtool" to find out about other features you're missing.
