Audacious doesn't look right

Affects version: 3.7.2	

Description

Running Ubuntu 16.04, Unity desktop with the default theme.

Installed Audacious 3.7.2.

It looks very strange, like the old Microsoft Windows 3.1 appearance. (I am attempting to attach a screenshot file to this message for you to view.)

This problem happens on the QT version and the "regular" version of Audacious.

Why is it doing this? How do I fix this? Thanks.
