Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #704

Error message

February 26, 2017 06:11 - jos ballard

Status:	Rejected		**Start date:**	February 26, 2017
Priority:	Minor		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Affects version:	3.8.2			

Description

When playing .mp3 files, I will sometimes get an error message saying "Unknown playback error (check the console for detailed error information).
This message will appear just at the end of the song. The player will continue on to the next track with no difficulty, and will play the affected track if you go back to it.
I have Audacious 3.8.2 installed on a Suse Leap 42.2 operating system with the KDE Plasma 5.8.3 desktop.
This bug seems to be similar to bug number 691.

- Status changed from New to Rejected

An error message is not a bug.

If you want help with figuring out why your files produce an error message, first do what it told you: get the detailed error information from the console. Then put that information into Google and see if you can find a solution. If you can't find anything, then post on the FORUMS here (not the bug tracker) asking for help.

Closing.
