Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #717

No Configuration for Plugins in QT GUI

April 23, 2017 15:00 - Conor Randall

Status:	Rejected		**Start date:**	April 23, 2017
Priority:	Major		**Due date:**	
Assignee:			**% Done:**	0%
Category:	libaudqt		**Estimated time:**	0.00 hour
Target version:				
Affects version:	3.9			

Description

The QT gui has no way to configure plugins, makin the majority of them entirely useless, even though they can still be enabled

those buttons do not show for me on OSX

#6 - April 26, 2017 01:43 - John Lindgren

We don't support OS X currently.

I don't own a Mac, but you're probably on the right track regarding the missing icons.

This partially solves a mystery for me! I assumed the Qt interface LACKED plugin parameter settings, but no, it's just the icons are missing, but it does seem to work! I didn't file a bug b/c I assumed you were aware of and working on it. I compiled GIT (recent, but not latest bleeding edge though) on Linux (not Mac), so can you direct me/us to what package, etc. that has the icons?

Thanks,

Jim Turner

#10 - May 01, 2017 14:15 - John Lindgren

Any standard icon theme (Tango, GNOME, Oxygen, etc.)
