Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #744

Some will be duplicate (really? 1+ years to fix absolute paths problem on playlist?) but some are not visible on the 1st page.

Target version:				
Affects version:	3.9			

Description

Windows versions: 3.9a (just downloaded this to update other I had).

Playlist uses absolute paths (this breaks my backups..... NEVER BREAK MY BACKUPS). Seriously, it DELETES the entries for files it cannot "find" because of this. I spent a lot of time making my playlist.

Classic Skin:
Middle mouse wheel button for volume adjustment somehow also adjusts speaker balance at the exact same time. Why is there no option to leave speaker balance alone/NOT mapped to the mouse wheel?

All other programs I use: I can click the taskbar icon where it is and maximize/unhide the program and i can immediately MINIMIZE/hide it away by clicking the taskbar icon again (this is the program running icon, not a shortcut). Audacious only allows maximize/unhide.
