

Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #776

Error - no such file or directory qt

February 07, 2018 13:34 - Raitaro Hikami

Status:	Closed	Start date:	February 07, 2018
Priority:	Minor	Due date:	
Assignee:		% Done:	100%
Category:	libaudcore	Estimated time:	0.00 hour
Target version:	3.10		
Affects version:	3.9		
Description Open one single file in audacious, play it, delete the file. If I do that I get WAAAY to many errors until audacious stops (10 that is). Shouldn't it stop after 1? Also I got this "burned in" error that just floats on the desktop that I can't get rid of. Most likely a plasma thing.			

History

- Target version set to 3.10
- Category set to libaudcore

The limit of 10 retries was put in place with longer playlists in mind. (If one or two songs in a long playlist are missing, we want to just continue on to the next one. If 10 in a row are missing, maybe it's a larger issue, like an unmounted filesystem or a lost network connection.)

You're right that this doesn't make much sense if you have a short playlist (fewer than 10 songs) on repeat. In that case, we should definitely stop trying as soon as we've failed to play every song in the playlist.

Fixed:
