

Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #793

alarm plugin needs rewrite

May 06, 2018 14:40 - Joe Kamprad

Status:	Closed	Start date:	May 06, 2018
Priority:	Major	Due date:	
Assignee:		% Done:	100%
Category:	plugins/alarm	Estimated time:	0.00 hour
Target version:	4.3		
Affects version:	3.9		
Description			
When i enable the alarm plugin it force to enable an alarm, set to the time i do enable the plugin. This can be very annoying if you do not remember this (or first time users). Alarm should be not be enabled without active setting it.			

History

#1 - June 30, 2018 02:05 - John Lindgren

The current alarm plugin has several serious problems:

- Unsafe use of pthread_cancel() -- on a thread calling into GTK!
- Heavy use of GTK, which we are moving away from in favor of Qt
- Usability issues such as this one

In a future version we'll probably just remove it. A replacement shouldn't be terribly hard to write.

#2 - June 30, 2018 02:07 - John Lindgren

- *Category set to plugins/alarm*
- *Subject changed from alarm plugin (audacious 3.9) enables alarm automatic after enable the lugin to alarm plugin needs rewrite*

#3 - June 30, 2018 02:08 - John Lindgren

- *Priority changed from Trivial to Major*

#4 - September 10, 2022 21:51 - John Lindgren

- *% Done changed from 0 to 100*
- *Target version set to 4.3*
- *Status changed from New to Closed*

It's been over 4 years and nothing has been done to save the alarm plugin. I've removed it:
