Target version:			
Affects version:			
Description			
Remember playback position within each tab/playlist?			
Use case: Frequently while listening to a long podcast file I will want to listen to another shorter file then resume listening to the podcast where I left off.			

History

#1 - June 11, 2018 01:01 - John Lindgren

This was implemented several versions ago. In the menus, it is the Playlist -> Play/Resume command.
