Description

Hi!

I'm currently running GTK-themed Audacious on the desktop machine with three displays+Xinerama. Audacious volume applet keeps showing on the wrong screen.

This is interesting: if I change volume with Audacious window on the leftmost screen, volume applet appears in the right place, just where it should be. If I change volume with Audacious window on the middle screen, volume applet appears on the rightmost side of the leftmost screen. If I change volume with Audacious window on the rightmost screen, volume applet appears on the rightmost side of the middle screen.

My system is up to date.

$ lsb_release -a
Description: Debian GNU/Linux unstable (sid)
Release: unstable
Codename: sid

$ apt-show-versions |grep audacious
audacious/sid uptodate 3.2.1-2
audacious-plugins/sid uptodate 3.2.1-3

We just use GtkVolumeButton; you should report this problem to the GTK+ folks.

#2 - March 13, 2012 00:12 - Ivan Kharlamov

OK, thanks again! :))
