Category:			**Estimated time:**	0.00 hour
Target version:				
Affects version:	3.6.2			

Description

I work with ubuntu 16.04 xenial and I use audacious for a long time, it is my favorite music player.

Today I installed software to listen to Internet stations, then I realized that Audacious was sending the following error message: Error when opening http://19193.live.streamtheworld.com:80/WRADIOAAC_SC: 403 Forbidden.

I uninstalled the streaming and audacious radio software by erasing all the configuration files and the libraries, I restarted the computer, I cleaned with autoremove all the garbage and reinstalled audacious, but continued to send the same error message: Error when opening http: // 19193.live.streamtheworld.com:80/WRADIOAAC_SC:
403 Forbidden
