Linux Mint Cinnamon 18.2			
<p>An enhanced music CD, with 20 minutes of video content, is ignored by Audacious...like it's not there. For what it's worth as a clue, Asunder CD ripper fails to see it either.</p> <p>Thinking that the CD had gone bad, I put it in my DVD/CD player, connected to the television, and both audio and video played without problem.</p> <p>I've raided the Software Manager, installing various codecs and plugins, but without success.</p> <p>Any ideas?</p>
