Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Feature #835

PLAYLIST tab -- right click on tab should open context menu (an enhancement suggestion)

October 21, 2018 05:42 - --peter josv.a.i

Status:	Closed		**Start date:**	October 21, 2018
Priority:	Trivial		**Due date:**	
Assignee:			**% Done:**	100%
Category:	plugins/qtui		**Estimated time:**	0.00 hour
Target version:				
Affects version:	3.10			

Description

I think it would be good to allow users to just "right click" PLAYLIST TAB
when they want to rename it, for example...
certainly not ALL menu items of "playlist" should go here... but "rename" definitely

version: 3.10 using QT interface
// nevertheless, the version info ("File/About") should also display interface version info

Yes, this would be nice. The GTK UI has such a menu with "Play", "Rename", and "Remove" items.

I want to eventually port all the features of the GTK UI to Qt, but it takes time.

- Status changed from New to Closed

This was implemented in the Qt UI some time back. Closing.
