Description It would be very helpful if we were able to select a playlist from a [list] view instead of a [tab] view. Finding a playlist in a scrollable list is much easier than finding it in a tabular view that isn't easy to navigate. It will become easier to drag songs across different playlists. Also, I don't think the tab view was designed to display a long list of tabs. For example consider the following tabular view:

[Tab 1][Tab 2][Tab 3][Tab 4][Playlist 1][Playlist 2][Playlist 3][Playlist 4][Playlist 5][Playlist 6][Playlist 7][Playlist 7][Playlist 7]

Compare with this list view:

[Tab 1]
[Tab 2]
[Tab 3]
[Tab 4]
[Playlist 1]
[Playlist 2]
[Playlist 3]
[Playlist 4]
[Playlist 5]
[Playlist 6]
[Playlist 7]
[Playlist 8]
[Playlist 9]

The list view is just way easier way to navigate. Especially when alphabetic sorting is added.

- File *PlaylistManager.png* added

You can use the Playlist Manager (in the Playlist menu) and dock it on the left. Like in the attached screenshot.

Wow I did not notice that you can right click the *Playlist Manager*.

I guess I am suggesting then to enable dragging/dropping songs into playlists displayed in the *Playlist Manager*.
