Target version:			
Affects version:	3.10		
Description			
<p>It's so great to have global shortcuts available from Global Hotkeys Plugin. I like top use Super + F1 to Super + F5 as shortcuts like this:</p> <ul style="list-style-type: none">• Super + F1: Previous• Super + F2: Play• Super + F3: Pause/Resume• Super + F4: Stop• Super + F5: Next track <p>But I have to press Super + F5 twice to go to the next track. To reproduce:</p> <ol style="list-style-type: none">1. Go to Plugins > Global Hotkey > Settings2. Set Next track to Super + F53. Press Super + F5 once and see that nothing happens4. Press Super + F5 quickly again, and the next track is played <p>If I set the shortcuts to something else like F1 for Previous track and Ctrl + F5 for Next track, it works fine. But those will conflict if I have a browser open, or another program, which is why I prefer Super + F1 to Super + F5, which haven't so far been used by another program.</p> <p>Ubuntu 18.04 Audacious 3.10</p>

Something else in your system is probably grabbing Super + F5. There is nothing special in our handling of that particular combination.

Not a bug.

#2 - December 08, 2019 16:43 - aur as

You're right, something was probably hogging the Super key ... I tried to understand why with xev, but just resorted to use Shift + Ctrl in stead, which works fine in Ubuntu 18.04:

- Shift + Ctrl + F1: Previous
- Shift + Ctrl + F2: Play
- Shift + Ctrl + F3: Pause/Resume
- Shift + Ctrl + F4: Stop
- Shift + Ctrl + F5: Next track
