Target version:	3.3			
Affects version:	3.2.1			

Description

I'm used to having a shortcut to focus (and bring to front) the Audacious playlist window. It's really useful to be able to get complete control over it.

Usually, I have a shortcut bound to "xdotool windowactivate $(xdotool search --title 'Audacious Playlist Editor')", but it would be nice to have this feature directly in the Global Shortcuts plugin.

History

#1 - April 02, 2012 00:55 - John Lindgren

- Category deleted (core)

- Target version deleted (3.2.3)

#2 - April 02, 2012 00:56 - John Lindgren

- Category set to plugins/hotkey

- Affects version added

- Affects version deleted (3.2.1)

#3 - June 16, 2012 20:02 - John Lindgren

- Status changed from New to Closed

- Target version set to 3.3

- % Done changed from 0 to 100

Implemented for 3.3:
