Target version:			
Affects version:	4.0.4		

Description

Hi,

ReplayGain in .aac files tagged (using aacgain v. 1.9) seems to not being recognized.

It happens as well in files with R128_TRACK_GAIN tag (using opus-tools 0.1.10 and r128gain v1.0.1) in .opus files.

I'm not sure if these two requests should be together: sorry if they shouldn't.

Thanks! Loving the player since years ago!

Same issue here with opus files and the R128_TRACK_GAIN tag. The player is unusable for me without this.
